

The 35th Chinese Control Conference

Plenary Speaker

John Doyle is the Jean-Lou Chameau Professor of Control and Dynamical Systems, Electrical Engineer, and Bio-Engineering at Caltech (BS&MS EE, MIT (1977), PhD, Math, UC Berkeley (1984)). Research is on mathematical foundations for complex networks with applications in biology, technology, medicine, ecology, and neuroscience. Paper prizes include IEEE Baker and Automatic Control Transactions (twice), ACM Sigcomm, AACC American Control Conference. Individual awards include IEEE Power Hickernell, AACC Eckman, UCB Friedman, IEEE Centennial Outstanding Young Engineer, and IEEE Control Systems Field Award. Best known for fabulous friends, colleagues, and students, plus world and national records and championships in various sports, extremely fragile.
