

The 33rd Chinese Control Conference

Plenary Speaker

Yi Huang received the Ph.D. degree in control theory and its applications from Southeast University, Nanjing in 1995. From 1995 to 1997, she worked as a postdoctoral fellow in the Institute of Systems Science, Chinese Academy of Sciences. From 1997, she has been at the Key Lab. Systems and Control, Chinese Academy of Sciences as an assistant professor and then associate professor and professor.

Her research work is concentrated on the control of nonlinear uncertain systems. In collaborating extensively with engineers to utilize the idea of the active disturbance rejection control (ADRC) for solving real world problems, she and her team do some further

analysis of ADRC.
