## Invitation

The 62nd IEEE Conference on Decision and Control will be held Wednesday through Friday, December 13-15, 2023 at the Marina Bay Sands, Singapore. The conference will be preceded by technical workshops on Tuesday, December 12, 2023.

The CDC is recognized as the premier scientific and engineering conference dedicated to the advancement of the theory and practice of systems and control. The CDC annually brings together an international community of researchers and practitioners in the field of automatic control to discuss new research results, perspectives on future developments, and innovative applications relevant to decision-making, systems and control, and related areas.

The 62nd CDC will feature contributed and invited papers, as well as workshops and tutorial sessions.

The IEEE CDC is hosted by the IEEE Control Systems Society (CSS) in cooperation with the Society for Industrial and Applied Mathematics (SIAM), the Technical Committee on Control Theory of the Chinese Automation Association (TCCT), the European Control Association (EUCA), the Korea Institute of Control, Robotics and Systems (ICROS), and the Japanese Society for Instrument and Control Engineers (SICE).

Singapore is a sunny, tropical island in South East Asia, off the southern tip of the Malay Peninsula. Ideally positioned in South East Asia, where the rest of the region is just a hop, skip, and jump away, Singapore is a thriving metropolis offering world-class infrastructure, a fully integrated island-wide transport network, a dynamic business environment, vibrant living spaces, and a rich culture largely influenced by the four major communities in Singapore with each offering different perspective of life in Singapore in terms of culture, religion, food, language, and history.
